

Application No. 10/829,656
Amendment dated July 5, 2006
Reply to Office action of June 7, 2006

Amendments to the Specification:

5 The office action stated that only a portion of paragraph 0059 was disclosed in the specification. This is due to an error during the transmission of the last response, causing page 19 of the last response to be missing. This page includes the rest of paragraph 0059, as well as paragraphs 0060 and 0061. The missing paragraphs have been added below.

Replacement Specification:

10 [0059] While the embodiments of the invention shown in the drawings include two magnets, it is within the scope of the present invention to replace one of the magnets with a magnetizable member. The magnetizable member is magnetized by the magnet and therefore allows to create the magnetic
15 interaction between the magnet and the magnetizable member that allows moving the object 14. Also, in some embodiments of the invention, at least one of the first and second magnets may be either a permanent magnet or an electro-magnet.

20 [0060] In other embodiments of the invention, the apparatus is decorated, for example with flowers, lighting or colors. Also, it is within the scope of the invention to use the above-described apparatuses with a candle illumination device including a variable color light source, such as the device described in US Patent 3,762,857 issued to Andeweg on Oct 2, 1973.

25 [0061] Although the present invention has been described hereinabove by way of preferred embodiments thereof, it can be modified, without departing from the spirit and nature of the subject invention as defined in the appended claims.
